PORTFOLIO
jv-maroto.github.io/portafolio

LANGUAGES

Spanish · Native
English · B1 (towards B2)

TECH STACK

Backend
Python · FastAPI · Django · DRF · Celery · SQLAlchemy · Alembic · PHP

Frontend
React 18/19 · TypeScript · Vite · Tailwind v4 · TanStack Query

Databases
PostgreSQL · pgvector · Redis · MySQL · SQLite

AI / ML
Ollama · Qwen 2.5 · Whisper · YOLO · OpenCV · embeddings · Anthropic API

DevOps
Docker · Docker Compose · Nginx · Vercel · Render · GitHub Actions

Systems
Windows Server · Active Directory · VPN · L2 networking (CCNA) · Apache

Integrations
Stripe · Telegram Bot · TMDB · JWT · AWS scripting

EDUCATION

Vocational Higher · DAW
IES César Manrique · 2024–2026 · Completed

Vocational Higher · ASIR
IES Domingo Pérez Minik · 2021–2022 · Completed

High School
Instituto Óscar Domínguez · 2021

CERTIFICATIONS

CISO Certificate — Nayan School · 2025
Advanced Python — OpenWebinars
CCNA Routing & Switching — Cisco
Cybersecurity Operations — Cisco
Introduction to Cybersecurity — Cisco
Apache 2.4 Web Server — 6h

About me

Full-Stack Python Developer focused on **AI integration** with **4 years** operating production infrastructure. I build end-to-end apps with FastAPI + React + Docker, integrating **local LLMs** (Ollama, Whisper), **computer vision** (YOLO, OpenCV) and **vector search** (pgvector). I combine the rigor of running critical systems with the pace of shipping product.

Featured projects

SportEvent · DAW final project live github
Sports event management and ticketing platform with Stripe payments and pytest suite. Final degree project (DAW).

FitDash github
Fitness dashboard with offline local LLM agent. Voice input (Whisper to LLM-structured text) and async Telegram bot. Privacy-first architecture.

WinSvalinn live github
Security audit and optimization suite for Windows. 100% local, no telemetry. Commercial freemium model: Free (MIT) and Enterprise editions.

CineStream github
Netflix-style media library with AI scene classification (YOLO+OpenCV) and semantic search via pgvector embeddings. Background heavy processing with Celery microservices.

Portal-Employes live github
Internal employee portal with JWT auth: payslips PDF, leave calendar, internal announcements, metrics dashboard.

JobHunter github
Personal job search automation: multi-source aggregator, Claude-powered scoring against CV, automatic CV + cover generation, LinkedIn assistant Chrome extension with human-paced interactions.

servidor-pi github
Home server on Raspberry Pi 5: full media stack + custom Python game finder integrated with qBittorrent + Windows agent reporting playtime.

Professional experience

Systems Engineer & Web Developer Jan 2022 – Present
Sagrera Canarias S.A. · Tenerife · On-site

- Web development and maintenance (PHP / PrestaShop): custom modules, CSS, third-party integrations and e-commerce in production.
- Automation with Python and Bash for backups, monitoring, deployments and user provisioning.
- Windows Server administration: 50 concurrent RDP users, Active Directory with 150+ accounts, group policies, backups.
- Network and infrastructure: routers/switches, L2 support, troubleshooting, VPN.
- End-user support: hardware, software, peripherals, daily incident resolution.

Event Timekeeper Occasional

G.Esport · Tenerife

- Timekeeping and result management for races and tournaments.
- Coordination with technical teams and event organizers.
